WILEY ONLINE LIBRARY

Introducing Wiley Online Library

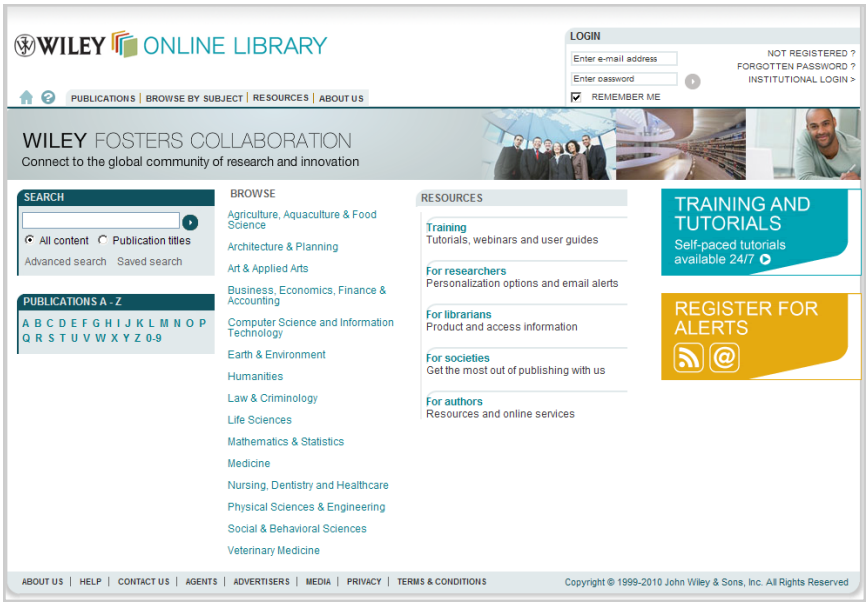
Developed in consultation with researchers, students, authors, society partners and library customers from around the world, ***Wiley Online Library***'s brand new user interface delivers intuitive navigation for all users. Easily discover, read, download, and cite current journal and book content, Early View articles, Backfiles, related material and supporting information.

Key features:

- Access icons indicate if the title is available and how (via institutional access, free or open access).
- Improved subject listing with 104 sub-categories.
- Subject homepages featuring titles and other news and information.
- Contextual help links you directly to our FAQ's.
- Improved reference linking with direct links from in-text references.
- Improved 'more like this' results.
- Improved e-toc (Table of Contents) alerts including accepted and Early View articles.
- Improved customer administration area.

Coming in future releases:

- Additional Advanced Search features.
- Most read and most cited articles.
- More reference management software options in the Citation export.
- Search term highlighting.
- Optimization for mobile devices.
- Links to social networking/bookmarking sites.



WILEY ONLINE LIBRARY

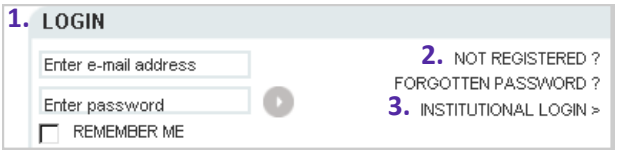
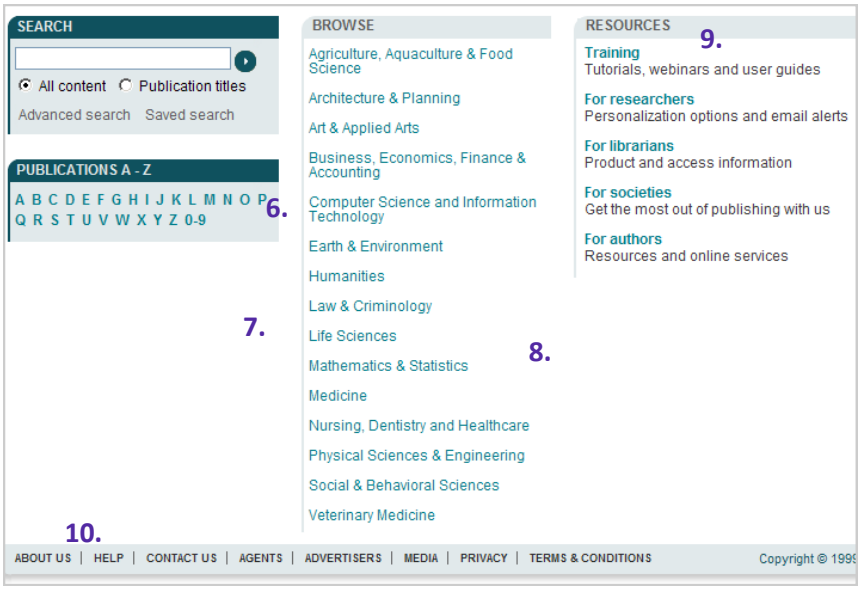
Home

Anyone can browse, search and view abstracts on Wiley Online Library. Registered users can also save titles and searches, set up email alerts and manage their account in My Profile.

If you have an existing Wiley InterScience login, your details will be automatically transferred to Wiley Online Library.

1. Login (if required)
2. If you want to register, click here.
3. Athens, Shibboleth and Institutional login link.
   * See your librarian for more information.
4. Tabbed browsing from any page.
5. Any messages, such as confirming a save action, or denied access, appear at the top of the screen.
6. Search for specific terms or publication titles across all content.
   * Use Advanced Search for more complex searches.
7. Browse publications alphabetically.
8. Browse by Subject Area for titles organized under subject headings.
9. Access resources for Librarians, Authors, Societies and Training. Includes link to customer administration area.
10. Information links at the bottom of all pages.





Notes:

WILEY ONLINE LIBRARY

Browse Alphabetically

From the homepage you can browse publications alphabetically. You can also access the browse alphabetically function from any page on the site by clicking on the Publications tabs.

Note: Reference Works are now listed under Books

1. Browse alphabetically by clicking on a letter in the Publications A-Z section on the home page, or click the Publications tab from any page.

2. Whether you browse to a specific letter or all publications, the layout will be the same.

3. Browse through all publications under the chosen listing, or

4. Refine your browsing using the filter options.

* Reference Works are listed under Books.

5. On the right of each title you can see what type of publication it is.

6. Access icons indicate whether you have access to the full text.

WILEY ONLINE LIBRARY

Browse by Subject

From the homepage you can browse publications by subject area. You can also access the browse by subject function from any page on the site by clicking on the Browse by Subject tab.

1. You can browse by subject directly from the homepage, or click the Browse by Subject tab.

2. To browse by subject, move your mouse over a the top-level subject headings. A list of next-level subjects appears to the right.

Click on a subject to browse all titles within that subject.

3. The subject page highlights four titles which change on a regular basis.

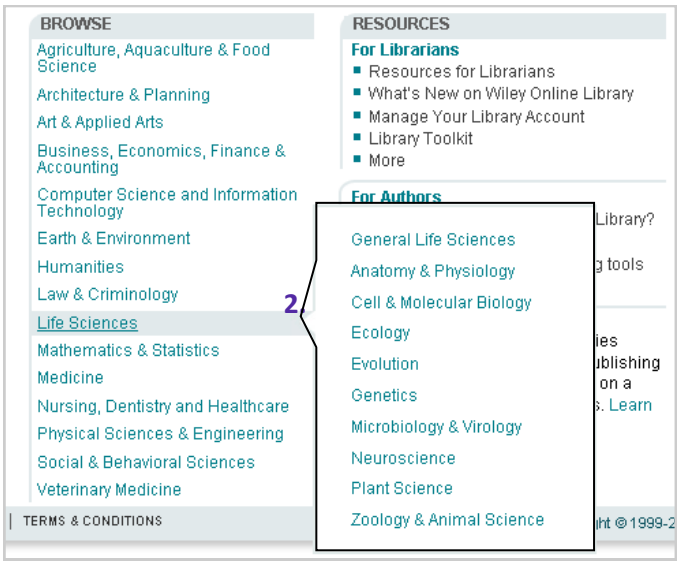
4. You can view all products in the subject, or

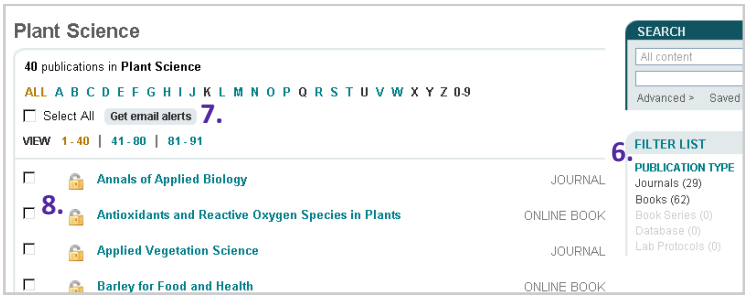
5. Browse by topic.

6. When browsing the full list of products in the subject you can filter results.

7. Select one or more journal titles to set up email alerts.

8. Access icons indicate whether you have access to the full text. See Browse Alphabetically for explanation.





Notes:

WILEY ONLINE LIBRARY

Search > Advanced Search

The Advanced Search page provides options for more complex searching. On the search results page (next) you will have the option to edit or save your search query.

Some of the specialized databases on *Wiley Online Library* are not covered by the main Advanced Search. To search them, go directly to the specific product site.

1. Access Advanced search from the homepage or anywhere on the site from the search box towards the top right of the screen.

2. Search Tips provide tips to help you get the most out of your search.

3. Choose Boolean operators AND, OR, NOT, from the drop down list and/or type them directly into the search text box.

4. Select specific fields from the drop down list.

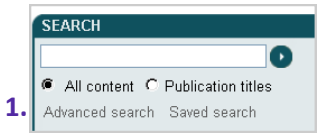
5. Add an additional search line.

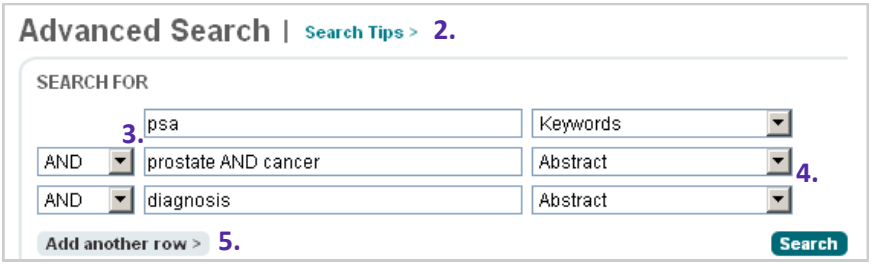
6. The Additional Criteria section will offer further options to refine your search results.

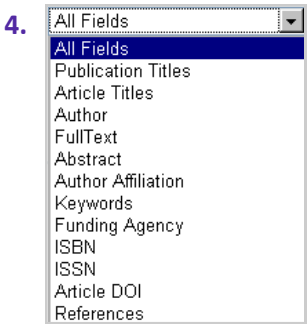
7. Select a specific date range.

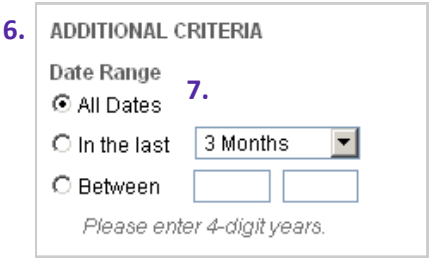
Future releases will include options to refine your search by:

- Publication type
- Subject and/or sub-category
- Access rights
- plus options for sorting results.









Notes:

WILEY ONLINE LIBRARY

Search > Search Results

On the search results page you have options to filter and sort results, export one or more citations, as well as save the search query to your profile (if you are a registered user and signed in)

1. Sort search results.

2. Click to edit your search query. The Edit search function returns to the Advanced Search page keeping search terms and options you have made.

3. Save search to your profile—only available to registered users.

4. Filter results by product.

   Future releases will include options to filter by year, access rights and subject.

Select one or more results and

   5. Save to your profile—only available to registered users.

   6. Export Citations.

   Future releases will include options to View abstracts and Email article links.

7. To view an article or chapter, click the title or specific links below.

8. Access icons indicate whether you have access to the full text.

9. You can export citations in Plain Text, EndNote, Reference Manager and RefWorks formats.

Keywords:
chaperone; export; SecB; site-directed spin labeling; EPR; protein–protein interaction; galactose-binding protein; OmpA
Abstract
SecB, a remarkable chaperone involved in protein export, binds diverse ligands rapidly with high affinity and low specificity. Site-directed spin labeling and electron paramagnetic resonance spectroscopy were used to investigate the surface of interaction on the export chaperone SecB. We examined SecB in complex with the unfolded precursor form of outer membrane protein OmpA as well as with a truncated version of OmpA that includes the transmembrane domain and lacks both the signal peptide and the periplasmic domain. In addition, we studied the binding of

5.
Over recent years the study of addiction has moved from being a fragmented and under-developed area of science to become a forefront subject with its own identity. This book describes that fascinating process of evolution through a series of probing face-to-face interviews with the international scientists and other actors in the field who helped make the process happen.

Addiction: Evolution of a Specialist Field
Published Online: 8 FEB 2008 12:00AM EST
Summary | References 9.
8.
Joy Mott
Joy Mott was born in 1933 in Cape Town, South Africa. She gained an MA in psychology from the University of Natal in 1956. She was a Research Officer, Home Office Research Unit (now Research Development and Statistics Directorate), London, 1962–65 and Principal Research Officer from 1966–94. Her professional interests include the links between opiate use and crime, the epidemiology of drug misuse, and the relationship between science and policy in the drugs arena.
Addiction: Why did you leave South Africa and come to London?
Joy Mott: I left in 1957 intending to stay in Britain for a year or two, get a research job, broaden my experience, and to do some travelling. My first jobs here included 18 months as a research assistant to a psychiatrist working on depressives' sleeping patterns and then a year as a clinical psychologist at a neurological hospital.
A: What was your training?
JM: I did an Arts degree at the University of Natal in Pietermaritzburg and then went on to do a Masters in Psychology. This involved writing a
experience as a clinical psychologist meant that I knew something about drugs – in the late 1950s and early 1960s amphetamines were often prescribed for the treatment of minor depressions.
Getting into drugs research
A: What was your first drugs project?
JM: The first drugs project I worked on was a description of drug offenders appearing before the London juvenile courts between 1965 and 1968. The magistrates were concerned about the increasing numbers of drug offenders appearing before

Databases

Wiley Online Library Databases offer highly specialized content organized according to unique requirements of their target disciplines in chemistry, materials, science, and medicine. Database home pages offer the same familiar interface as all Wiley Online Library products, with specialized navigation links for unique content.

1. From the Book Tools and Menu you can browse or search, and find information on getting access, author guidelines, editorial news, sample content, demos and special features - where available.

Some of our databases are hosted on separate web sites and you will link to these from here.

2. Access icon indicates whether you have access to the full text. See Search Results for explanation.

3. Find articles by browsing or using product specific search features.

4. Introduction and other information such as news, spotlight and features will appear here. Content will depend on the Database.

5. Product advanced search features depend on the database, with searching by structure and reagent available in most chemistry databases, and MeSH or other medical focused search features available in our medical databases.

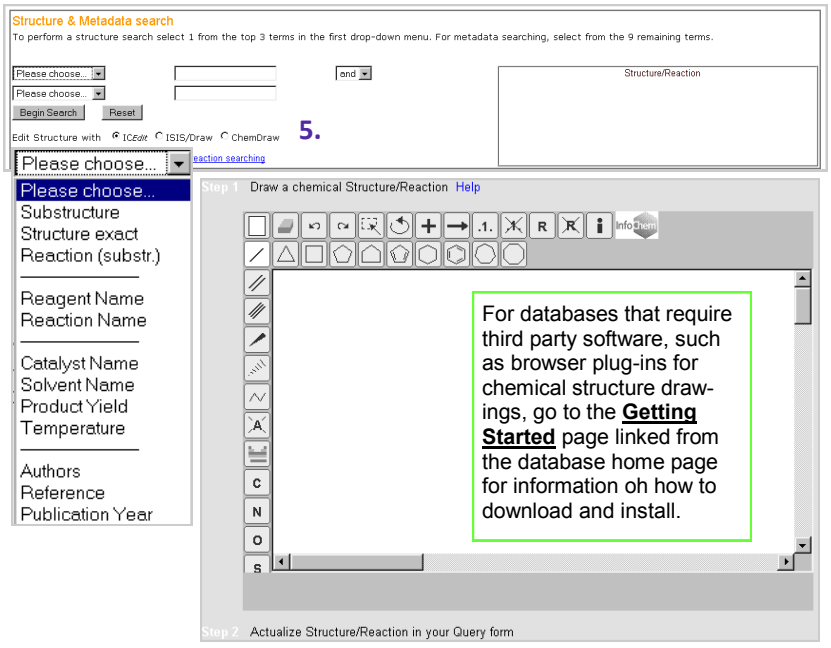
Welcome to the home of e-EROS, the online version of the critically acclaimed Encyclopedia of Reagents for Organic Synthesis. This online edition is more than a Major Reference Work, as it combines the complete text of the Encyclopedia with the sophistication of a Database including all the chemical reactions and structures!
e-EROS utilizes the full potential of the web by browsing through the A – Z list of Reagents [see Reagent Names] by allowing alphanumeric searches through e-EROS and across all Wiley products [see Search In This Title], and by allowing chemical structure, substructure and reaction searching straight from the desktop [see Structure Search], or by looking up names of authors [see Contributors]. e-EROS contains a database of around 70,000 reactions and more than 4000 of the most frequently consulted reagents and catalysts, and is fully searchable by structure and substructure, reagent, reaction type and experimental conditions etc.
e-EROS offers a systematic and exhaustive coverage of reagents used in organic synthesis. The Editors are keeping e-EROS up-to-date by regularly adding new reagents and catalysts, and by updating existing articles whenever felt necessary [see What's New]. The A to Z listing covers classical reagents, new "designer" reagents and catalysts.
e-EROS has been designed and developed by chemists for chemists to enable the user to find the most suitable reagent or catalyst for performing particular reactions. A variety of searching options are available that mirror the way chemists think. Search by:



For databases that require third party software, such as browser plug-ins for chemical structure drawings, go to the **Getting Started** page linked from the database home page for information oh how to download and install.

Notes:

WILEY ONLINE LIBRARY

Current Protocols

Current Protocols (CP) is a comprehensive and constantly-updated source for laboratory methods in all areas of the life sciences. In addition to the full text and referencing linking available only to subscribers, Current Protocols features free abstracts, images, video protocols, community pages, and tools and calculators.

1. When browsing for Current Protocols, select the Lab Protocols filter.

2. Access icon indicates whether you have access to the full text. See Search Results for explanation.

3. Search within Book, or use the Advanced Product Search.

4. Table of Contents appears on home page for easy access to articles.

5. From the Book Tools and Menu—available on all pages—you can link to the homepage and table of contents, and find information about getting access, authoring, editorial news and sample content.

6. Special features include video protocols— free to everyone.

7. See Article Full Text for information on accessing and viewing articles.

8. The separate *current-protocols.com* site includes additional content such as tools and calculator, discussion boards and an editors blog.

Registration

As a registered Wiley Online Library user you can save articles, chapters, publications and searches; set up email alerts for content, citations and saved searches; and purchase individual articles, chapters or subscriptions. *If you have an existing Wiley InterScience login, your details will be automatically transferred to Wiley Online Library.*

1. Click the Not Registered link on homepage.

2. On the Registration page enter your email address—which will become your user name—and choose a password.

3. Enter your first and last names, country and area of interest.

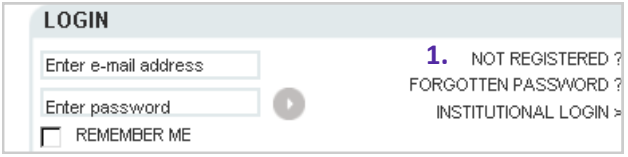
   * This information is never shared with any third party.

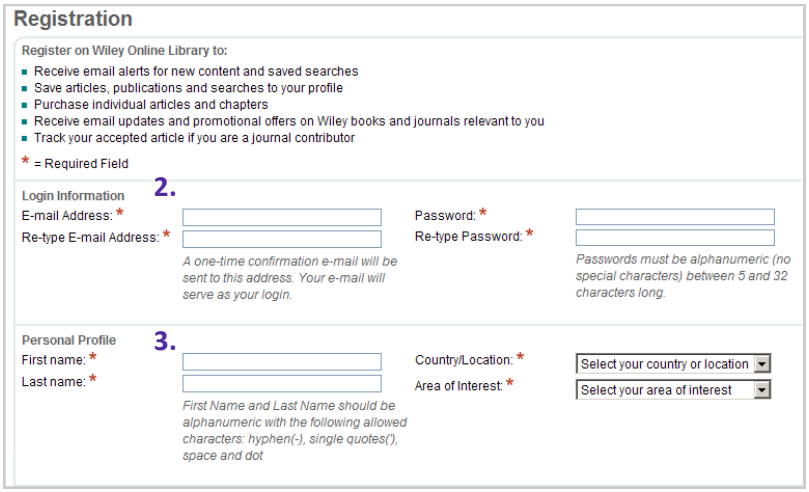
4. Click the relevant checkboxes if you would like to receive promotional information by email or by regular mail.

5. Enter your mailing address if you have selected to receive promotional material by regular mail.

6. Check details, view Terms and Conditions and check the box, then click on Submit Registration.

   * Once submitted you will receive an email asking you to validate your registration.





Registration
Register on Wiley Online Library to:
Receive email alerts for new content and saved searches
Save articles, publications and searches to your profile
Purchase individual articles and chapters
Receive email updates and promotional offers on Wiley books and journals relevant to you
Track your accepted article if you are a journal contributor

My Profile

In the My Profile area you can manage your saved articles/chapters, publications and searches; manage email alerts; edit your personal and login details; check order progress and manage subscriptions. All your saved titles, articles and email alerts will be migrated from Wiley InterScience—saved searches will not due to a difference in technology.

1. Log in.

2. Click on the My Profile link (from any page).

3. On the My Profile pages you can access all features from the menu on the left:

4. Edit your account and login information.

5. Track your orders and view subscription details.

6. Activate or refresh roaming access.

7. Manage your saved articles/chapters, publications and searches.

8. To stop or start an email alert click on Stop/ Start or Activate alert.

9. Manage your email alerts. As well as Table of Contents (e-toc) alerts, Wiley Online Library provides Early View (EV) and Accepted Article (AA) alerts.

Those registered for e-toc alerts will automatically receive EV and AA alerts but can opt out. Future developments will include citation alerts.

Roaming Access

Access to Wiley Online Library is IP (Internet Protocol) range access controlled: This means that no login is required for accessing subscribed content from within your organisation's network.

However If you wish to access subscribed content from home or on the road, you can activate roaming access.

To set up roaming access you must be a registered user, logged in and within your institution IP (network) range to activate.

1. Login and go to My Profile.

2. Click on the Roaming Access link on the left menu.

3. To activate or refresh roaming access click on this link.

Roaming access is limited to 3 months.

4. The expiry date of your current roaming access period is shown here.

To refresh, simply click the Refresh Roaming Access link again.

About Us

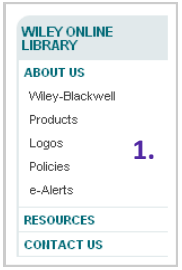
In the About Us area you can find information on Wiley Online Library publications and services including titles, pricing lists, access options and contact information.

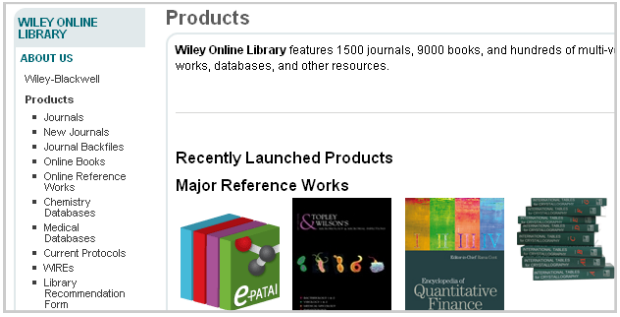
The left hand menu provides quick access to all sections.

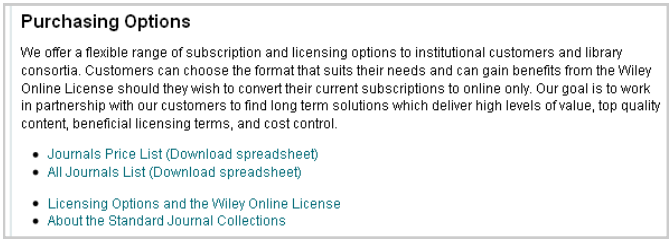
1. In the About Us section view details of all our products including title and pricing lists and purchasing options, set up e-alerts, and view policies including Open Access, Author Rights and Institutional Repositories , Environmental Policies and Accessibility.

2. Under the Resources section you can access information for your specific needs including information for end users and institutions such as newsletters, RSS feeds, Pay Per View information, user guides and training, and advertising information including guidelines and rates, and reprints.

3. The Contact Us section provides 24/7 access to help desk services including an online logging system and FAQ's, and email and telephone support available 24 hours a day from Monday to Friday.







Purchasing Options
We offer a flexible range of subscription and licensing options to institutional customers and library consortia. Customers can choose the format that suits their needs and can gain benefits from the Wiley Online License should they wish to convert their current subscriptions to online only. Our goal is to work in partnership with our customers to find long term solutions which deliver high levels of value, top quality content, beneficial licensing terms, and cost control.

For Authors 5.
Welcome. We are pleased to announce Author Services for journal authors, now available at authorservices.wiley.com. Author Services enables authors to track production and publication of their accepted articles. Additionally, many journals now offer authors free access to their published articles online and the ability to nominate up to 10 colleagues for free access.
Any accepted articles you were tracking on Wiley Online Library have been moved to Author Services. Just use your Wiley Online Library login to view your accepted articles. If you had not yet started to track an article, but received an e-mail from Wiley with an alphanumeric code, please contact e-help and include the journal name, article title, corresponding author e-mail address, and the date of acceptance. You will be issued a new 'Unique ID' to enable you to track in the new Author Services system.
Newly accepted articles will also be tracked on Author Services. When your article is accepted and logged into our production system, you will receive a welcome e-mail. This e-mail will contain an Author Services website address and unique code that enable you to add the article to your account for tracking.

Author Information

Would you like to write an article for a Wiley Online Library title? You can find journal-specific author guidelines on the homepage of individual journals. In addition, Wiley has a dedicated site, Author Services, which also provides information for potential authors.

1. The For Contributors section in the left-hand menu is the first place to go to find out more about writing for a particular title and includes information about Editorial Policy / Aims & Scope, Ethical Guidelines , Manuscript preparation, and submission.

2. Within the Author Guidelines/For Authors information is a link to the Author Services site.

3. On the Author Services site you will find guidelines, resources, contact information and answers to FAQs.

4. Many of our journals use the online manuscript submissions system ScholarOne Manuscripts. There you can track your articles from submission to acceptance.

* Titles that don't use ScholarOne Manuscripts have submission instructions in their author guidelines.

Journal Backfile Collections

Fully searchable and link-enabled, Wiley Online Library Journal Backfile Collections restore a crucial connection with historical material, pre-dating online migration.

Our retrospective collections are integrated with current web-based content and offer the same flexible retrieval and printing capabilities.

1. Covering a range of tightly defined subject disciplines, our Backfile Collections represent a comprehensive archival solution - and eliminate issues of limited shelf space, collection gaps, materials degradation, and access.

2. The Backfile Collections are presented just like current journals—organized by issue, article abstract, references with citation links, and full text in PDF.

Unlike current journals, license to access full-text backfiles is not based on an annual subscription, but a one-time purchase of the collection. For more information see the Journal Backfiles page on Wiley Online Library.

Backfile collections include: 1.

Biotechnology, Biochemistry and Biophysics
Business and Management
Chemistry
Communications Technology, Electrical & Systems Engineering
Food Science, Technology and Agriculture

WILEY ONLINE LIBRARY

Individual Access Options

Most content on Wiley Online Library is available on an annual subscription basis. However, there are two options that allow users to access individual articles and chapters outside their regular subscription holdings— **Article Select** and **Pay-Per-View.**

Article Select is available for licensed institutions. Ask your librarian for further details.

Use **Pay-Per-View** if you are not affiliated with a subscribing institution, or wish to directly access non-subscribed content.

1. You must be a registered user and logged-in.

Click the Full Text link of the article or chapter you wish to access.

2. An Access Denied message appears—with links to purchasing options.

3. Enter your billing address. You must enter a valid billing address (this is for verification only and is not kept on our system).

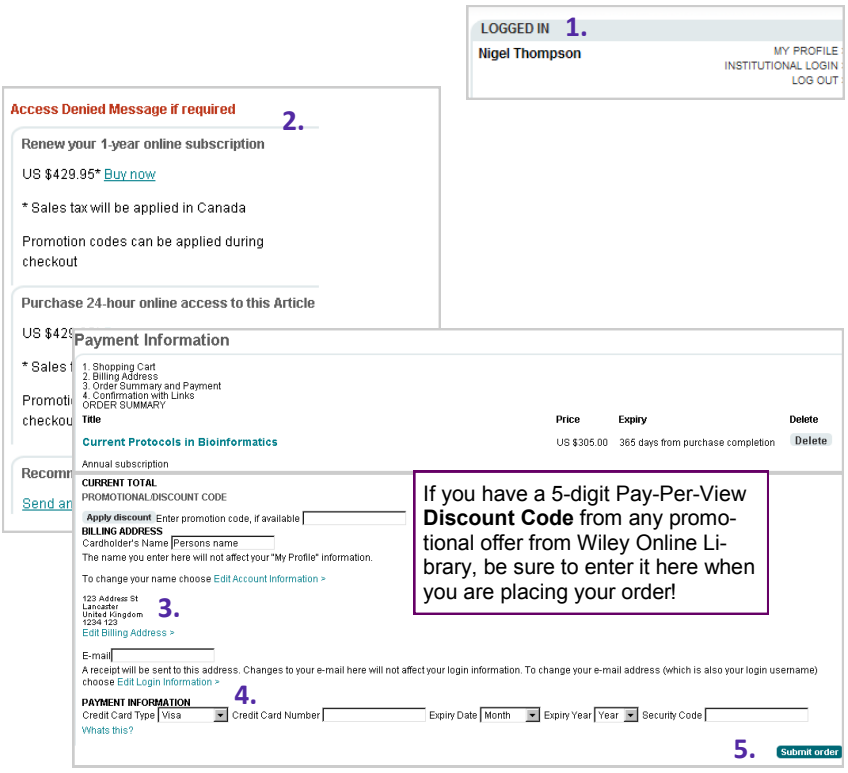
4. Complete credit card information for billing.

5. Check your order and then click "Submit Order".

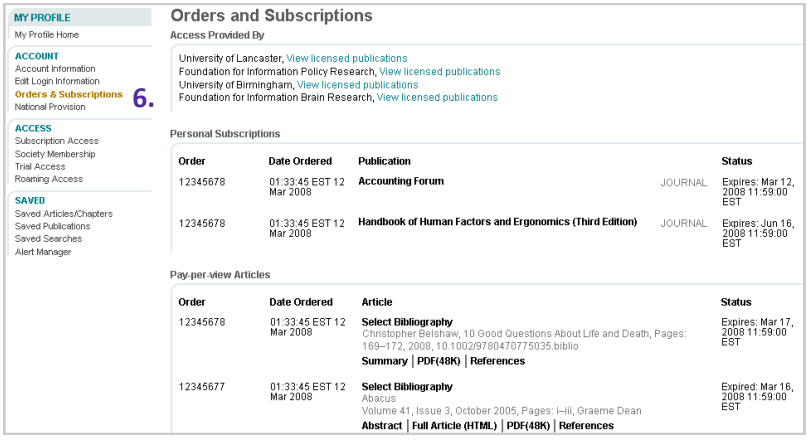
You should now have immediate access to the article or chapter for **24 hours** from when you submit your order.

You will receive a confirmation e-mail with a link to the article or chapter for your reference.

6. Track details of your order (including when the 24-hour access period will end) in the My Profile area under Orders & Subscriptions.



If you have a 5-digit Pay-Per-View **Discount Code** from any promotional offer from Wiley Online Library, be sure to enter it here when you are placing your order!



Notes:
